Plan

Major City — Europe's *Largest Dealership**

*As of the time of the beginning of the design phase

More than 200 000 m²

The total area of all launch phases of the complex

Work performed

Technical customer
Technical supervision

Compliance with and adaptation of design solutions developed by the representative offices of foreign car-makers under the norms and regulations of the Russian Federation.

During the implementation of the project, extensive work on the optimization of the design decisions was carried out. Many new technologies and business processes that had not been previously used in projects of this kind were approved for use on this project.

Lamborghini Moscow

Car showroom

The project was developed with the concept of the brand and all technical specifications in mind. It was necessary to design the exterior and interior of the building in accordance with the requirements of the carmaker who required premium-class car showrooms.

Aston Martin

dealership

Moscow-City District, centuries-old English traditions, German architectural style, multi-level underground parking garage and an existing residential development — our team solved all these intricacies of the project on this site.

Porsche

showroom

Brand new showroom on Smolenskaya square in Central Moscow — a perfect combination of the Porsche philosophy and a unique location. Our team of professionals is able to realize a high-tech design in the vicinity of historic and government buildings.

Successful experience in
adapting Western standards
and technology

***35 dealerships totaling more
than 4 billion rubles***

A-Class Warehouse Complex *Pavlovskaya Sloboda*

100 000 m² 15 ha

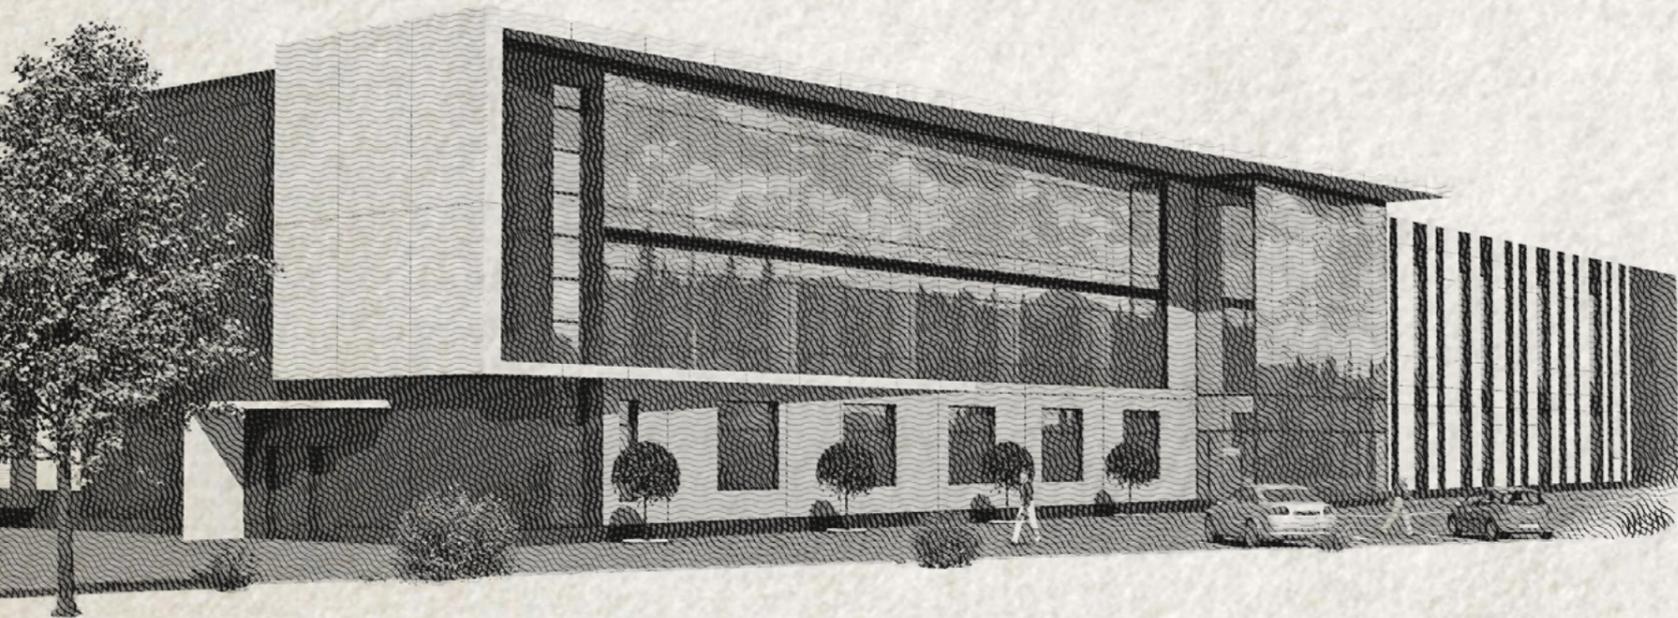

The total area

Sorting lines.

Very narrow aisle storage areas.

Automation and dispatch control of all production processes.

Performing the functions of the technical customer, General Designer and specialized types of work.

Distribution Center *Fresh Market*

60 000 m² 15 ha

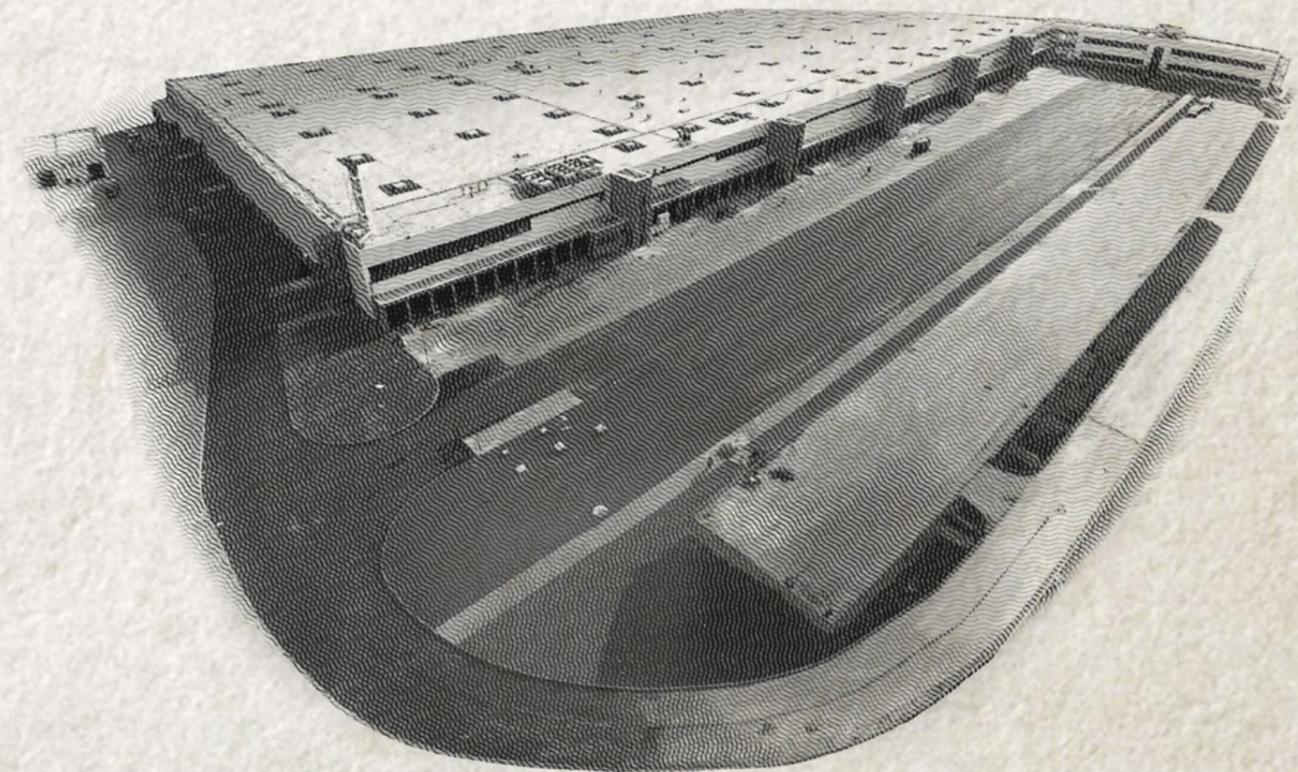

The total area

Area of the multi-refrigerators and freezers.

Adapting Austrian concept in accordance with the standards of the Russian Federation.

Technology developed from scratch.

1.5 years of construction, commissioned in the fall of 2014.

Sorting Center for *Major Express*

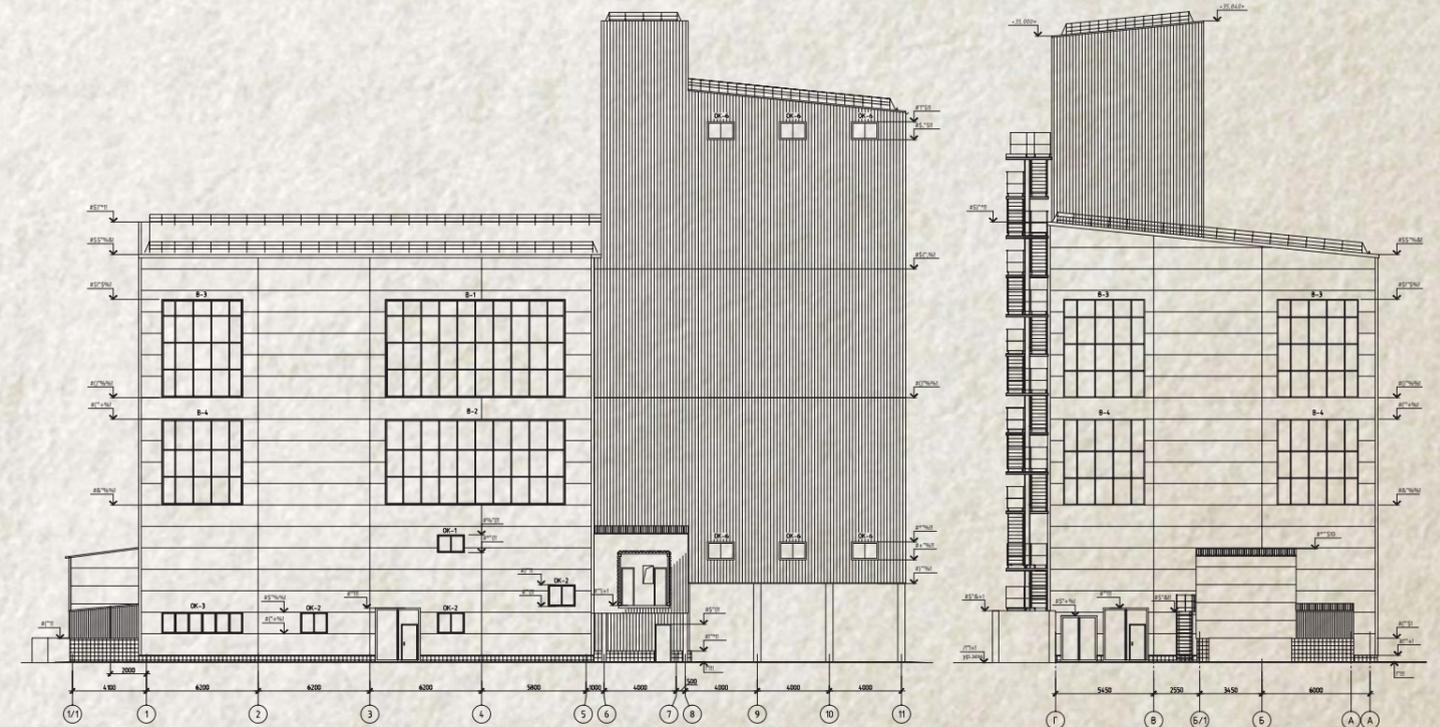

Multifunction center for FedEx's partner in Russia — the Major Express company — was a fresh challenge for our team. We had to reconstruct the old building of the printing plant and place modern sorting equipment in it.

All work was completed within 6 months and today this complex is one of the most modern centers for sorting and storage of goods.

Dry Mixtures Plant for *UNIS*

UNIS is a recognized leader in the production of dry construction mixtures in Russia and CIS countries. For this reason, we use the company's products during the implementation of our projects. Recently the partnership has expanded: we are carrying out a full range of work on designing and construction of their sand drying plant in the town of Kotelniki in the Moscow region. Commissioning is scheduled for the 4th quarter of 2015.

Lighting-tech *Solutions*

Our Services

- Lighting design
- Development of lighting design
- Electric systems design
- Fire safety systems
- Security systems, automation and dispatching, communication networks, “smart home”
- 0.4 kW on-site utilities

More than 1 000 000 m²

of cable lines have been laid by us
